

Quality Test Engineer

Reward

£25,000-£35,000 depending on experience

Location

Cardiff, but currently working from home

Role

We are looking for a Quality Test Engineer to join the Development Team within our established IT department.

You will ensure the continuous delivery of quality, robust software applications through quality assessment of application changes, maintaining test suites and regression testing software prior to release.

Qualifications and skills

You will have experience of working in a software development team, ideally involving quality assessment. You will have experience of working in an Agile software development environment.

You will hold a degree in IT, Computer Science or have equivalent relevant education and experience in a software development team.

A knowledge of C#, HTML and JavaScript is desirable as is experience of creating automated UI tests.

We are looking for candidates who are proactive in their approach to tasks, can think for themselves in order to solve problems and able to communicate effectively with a variety of people.

A full job description is available on request.

What next?

If you are interested in applying for this role, please submit your application via the online portal on our website.

Please note the closing date for applications is Sunday 10th January 2021. We reserve the right to close this vacancy early once a sufficient number of applications have been received.
